PROFESSIONAL EXPERIENCE

Flutter Developer

Abservetech | June 2024 - Present

- Developed and deployed cross-platform Android and iOS applications using Flutter, specializing in cloning high-profile apps such as Airbnb and Zomato.
- Utilized state management tools like GetX and Provider for efficient application architecture and performance.
- Implemented Firebase Push Notifications to enhance user engagement and real-time communication.
- Integrated maps and location-based services for dynamic app functionalities.
- Followed MVVM code architecture for clean, scalable, and maintainable code. Managed successful app launches on both the Play Store and App Store.

Flutter Developer

Mind Vision Technologies | July 2022 - May 2024

- Developed a web and mobile applications using technologies like Flutter, Html/Css, and Javascript
- Built a WhatsApp broadcasting service web app with a Flutter frontend, enabling efficient message distribution
- Designed and implemented a user bio page akin to Linktree, allowing users to consolidate and manage personal links
- Created a task management app similar to Asana, with features for ticket raising, assignment, and agent collaboration
- Developed a user account management app with capabilities to handle assets, contacts, subscriptions, and plans mirroring Meta's account center
- Built a content management system with a custom web editor, empowering users to easily create and manage web pages
- Utilized native web development technologies to deliver high-performance, responsive, and cross-browser compatible applications
- Collaborated effectively with cross-functional teams to gather requirements, set timelines, and ensure successful project delivery
